

## STEP – BY – STEP GUIDE FOR CO2 LIFT PRO/CARBOXY GEL

1. Massage the small packet to soften before opening.
2. Empty the entire contents of large pack and small pack into a mixing bowl.
3. Mix thoroughly for 1 minute to activate the carboxy.
4. Apply immediately to the area with the small application stick.
5. Ensure a THICK application layer is applied.
6. Leave on for 45 minutes.
7. Gently rinse off gel with warm water or lift off gently if applied on an incision area.
